- ☐ the sequence listing (*specify*): _____
- ☐ any table(s) related to sequence listing (*specify*): _____

* If item 4 applies, some or all of those sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/EP2004/004153

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-8	YES
	Claims		NO
Inventive step (IS)	Claims	1-8	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-8	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

The following document was cited by the applicant in the description of the application; the same numbering will be used throughout the procedure.

D1: US-A-2 547 947

Document **D1** is considered to constitute the prior art closest to the subject matter of claim 1 and discloses a contact assembly, a process and a use according to the preambles of claims 1 and 3. That contact assembly comprises a tungsten contact disk welded to a metallic support.

The subject matter of claim 1 therefore differs from the known contact assembly in that at least some parts of the welding layer and support are coated with a tin layer.

The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

The invention addresses the problem of developing a contact assembly whose switching properties are not affected by a moist warm climate.

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

The available prior art documents or the general professional knowledge of a person skilled in the art do not suggest the concept of the above-mentioned contact assembly.

The solution to this problem, as proposed in claim 1 of the present application, involves an inventive step (PCT Article 33(3)).

Claims 2-3 are dependent on claim 1 and therefore also meet the PCT novelty and inventive step requirements.

Independent claim 4 describes a process for producing a contact assembly as per claim 1. The subject matter of claim 4 is therefore novel and involves an inventive step (PCT Article 33(2) and 33(3)).

Claims 5-7 are dependent on claim 6 and thus also meet the PCT novelty and inventive step requirements.

Independent claim 9 describes a use of a contact assembly as per claim 1. The subject matter of claim 9 is therefore novel and involves an inventive step (PCT Article 33(2) and 33(3)).
